

Jakir Ali Sayyed

Backend Engineer | Golang | Microservices | Fintech Payments (UPI/ PG) | PostgreSQL | MongoDB | Redis

Mumbai, Maharashtra, India | 8108893686 | jakirsayyed98@gmail.com

LinkedIn: www.linkedin.com/in/jakirsayyed

A Software Engineer with over 3 years of professional experience, who successfully transitioned from leading Android development to specializing in Golang microservices. Proven ability to build and deploy highly scalable FinTech platforms, including Budget Management and Split Bill functionalities, with a strong focus on security, including Runtime Application Self-Protection (RASP) and compliance with PCI DSS, NPCI, and CERT-In standards. Proficient in a modern tech stack including PostgreSQL, MongoDB, and Redis.

Professional Experience

FinTech Backend Engineer (Payments & Microservices)

Paydoh (Grapesberry Technologies Pvt Ltd), Mumbai, Maharashtra | August 2023 - Present

1. Engineered and maintained a suite of **Golang-based microservices** for a new fintech platform, successfully supporting millions of transactions in a simulated production environment.
2. Designed and implemented over **10 core APIs**, including services for **stores, budgets, transactions, rewards, split bills, and payments**, which now form the backbone of the platform.
3. Developed a comprehensive **split-bill system** that allows up to **10 users to split expenses per group transaction**, demonstrating expertise in handling complex group-based logic.
4. Integrated secure **UPI payment gateways** and built a robust logging system that **reduced manual auditing by 10%** and improved real-time transaction validation.
5. Engineered and deployed secure microservices with robust security protocols, including **Runtime Application Self-Protection (RASP)**, ensuring full compliance with **PCI DSS, NPCI, and CERT-In guidelines**.
6. Refactored and optimized critical codebases, resulting in a **20% reduction in average API response time** and a **15% improvement in system performance**.

Android Application Developer – Shopping, Wallet & BBPS Systems

BITINFOZ BUSINESSES INDIA PRIVATE LIMITED, Mumbai, Maharashtra | February 2022 - August 2023

1. **Led the front-end development** as the sole Android Application Developer, successfully contributing to an app that achieved **over 10,000 downloads** on the Play Store.
2. Developed and maintained native Android applications using **Java and Kotlin**, ensuring high-quality functionality and a seamless user experience.
3. Integrated multiple payment gateways, including **Paytm, Razorpay, and PayU Money**, to handle millions of secure and efficient transactions.
4. Implemented core FinTech services such as **BBPS (Bharat Bill Payment System)** and real-time gold price tracking, which significantly enhanced app functionality and user utility.
5. Designed and engineered a custom **voucher and cashback system** that drove a **15% increase in user engagement** and improved retention.
6. **Optimized app performance**, reducing load times by **20%** and improving stability, which resulted in a higher rating on the app store.
7. Collaborated with a cross-functional team to integrate APIs and maintain version control, ensuring the timely delivery of **over 10 major app updates**.

Education

Bachelor of Commerce (B.Com) in Business/Commerce, General January 2018 - December 2021
Sandesh Vidyalaya, Mumbai University

Key Skills

- **Backend:** Golang, Microservices, RESTful APIs, Fintech Payments (UPI/PG)
- **Databases:** PostgreSQL, MongoDB, Redis
- **Mobile:** Android, Java, Kotlin
- **Tools:** Git, Postman, Android Studio, VS Code, Nginx, Redis, MongoDB, Postgress
- **Concepts:** API Integration, System Design, Scalability, Performance Optimization
- **Problem-Solving**
- **Collaborative Teamwork**
- **Project Management**

Projects

Scrapwala App

- **Role:** Solo Android Developer
- Developed a native Android application for online scrap selling, achieving over **1,000 downloads** in its initial launch phase.
- Integrated real-time order tracking and secure payment gateways like **Razorpay**, handling hundreds of transactions and enhancing user convenience.

Perkhub

- **Role:** Full-Stack Developer
- Developed a **cashback and affiliate shopping application** using native Android, which drove user engagement by providing a platform for **HTML5 games** and a custom **voucher system**.
- Built and maintained a robust backend in **Golang** with **PostgreSQL** that processed data for thousands of users and integrated third-party APIs for seamless payment gateway processing.
